ENHANCED SELF-SERVICE WITH CORE INTEGRATION

CONVENIENCE AND SIMPLICITY ARE KEY.

Direct Integration enables an Enhanced Self-Service Transaction set (24×7) beyond what is offered at a traditional ATM.

Consumers want their financial institutions to help them accomplish more in less time. With a core integration, you'll drive more transactions to enhance the self-service channel and make better use of automated technology.

Enhanced Self-Service Benefits

- Consumers can transact on all accounts in the core
- 24x7 access at any ATM/ITM
- Check cashing
- Loan payments with cash or check
- Use your business rules for transaction fees and holds
