

Plug-and-Play Passwordless Identity Authentication

Biometric Verification

more secure &
non-invasive

Passwordless

reduced risk of
account take-over

App-less & no-code

deploy in less than
an hour

Fast

70% reduction in
authentication time

Put an end to the frustration of repeatedly sharing personal information whenever and however you interact with your consumers—in person, call centers, video tellers, and online. Use it again and again whenever identity is critical.

Private

Provides an embedded environment of advanced security layers: biometrics, device binding, cryptographic handshakes, and more to ensure privacy.

Persistent

Once enrolled, the credential continues to provide a verified identity for the user and the companies they interact with.

Portable

Whenever and however you interact with companies—in person, via call centers, video kiosks and online.
